## Your design as a unique eye-catcher!

**Signgrass®** tufted synthetic grass mats are for outdoor as well as indoor use. The logos and designs can be applied for sports pitches like football, hockey, tennis, multisport, rugby and cricket, children's playgrounds, golf driving range mats, landscaping and commercial flooring like sponsor mats, red carpets, branding, in store promotion, exhibition flooring or as an eye catcher at the entrance of your company.

Thanks to the unique technique of **Signgrass®** it's possible to tuft your logo, slogan or design in fine detail. We provide a broad selection of yarn, standard colours and tints, but it's also possible to supply us with your own yarn. If the logo mat has to meet the same technical specifications as the surrounding synthetic grass, you can send us the technical datasheet including sample. We can determine the pile height (10-60mm), gauge and stitch rate, so the logo mat will have the same density. The end result will look like a seamless surface!

Our team can help you with the creation of your own logo or design and advice to get an optimal view of detail. The only thing we require is a high resolution/Vector file (.ai/.eps) and the required size of the logo mat.

### Have we caught your interest?

Please feel free to contact us for the numerous possibilities or informal offer.
