

# BRINGING OLYMPIC TECHNOLOGY TO YOUR BACKYARD!

## INTRODUCING AUSTRALIA'S FIRST SYNTHETIC GRASS MADE FROM SUGAR CANE...SYNLAWN CLASSIC GT

This new **premium landscaping solution** is made from **60% renewable resources** and is the latest innovation by Australian manufacturer, APT Asia Pacific. SYNLawn Classic GT has all the benefits of a durable synthetic grass, but is now **environmentally friendly**.  
HOLY SUGAR!

Utilising **Green Technology (GT)** recently developed for **Olympic Hockey fields**, APT have revolutionised the synthetic grass industry with this **sustainable** solution that gives consumers an opportunity to get their weekends back whilst reducing their carbon footprint.

### LANDSCAPING SOLUTIONS JUST GOT GREENER.

## SO HOW DOES IT GET FROM BEING SUGAR CANE TO YOUR NEW LAWN?

1 Sugar cane captures CO2 from the atmosphere

2 Sugar cane is crushed mechanically

3 Extracted bi-product is fermented to create ethanol

4 Under heat and pressure, water is removed from the ethanol to create an ethylene gas

5 Ethelene gas is transformed into small polyethylene beads

6 We add **HeatBlock™** technology to the beads to keep the product cool and green

7 Yarn is extruded in our Melbourne based factory

8 SYNlawn Classic GT is the world's first environmentally friendly synthetic lawn!

Sugar cane is a natural bio-based plant which absorbs carbon dioxide in the air rather than emitting it like other oil-based materials do. Thereby, this **sustainable** and **recyclable** product reduces the greenhouse effect and global warming.

SYNLawn Classic GT grass is available in a 45mm pile height that **looks lush** and **feels soft** all year round.

Pet friendly and backed with an incredible **15-year Australian-made warranty**, this exciting landscaping innovation offers a **sustainable** solution that gives you green grass, in more ways than one!

Keep your grass green and the planet healthier by choosing SYNlawn Green Technology (GT).

**SYNLAWN®**
