# P-OFF™

## INFILL

### Cool & Fresh

#### ARTIFICIAL GRASS THAT:

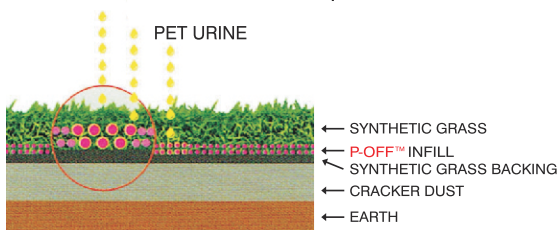

#### Feels Cooler

#### Stays Cleaner

#### Smells Fresher

#### P-OFF™ COOL & FRESH

Neutralizes Pet Urine and Keeps Your Lawn Cooler

#### WITH P-OFF™ INFILL

Pet urine is absorbed by the P-OFF™ Infill and odours are substantially neutralised

## P-OFF™ Infill For Pets

### Simply the best odour control for synthetic turf

We all love our pets and want them to be able to enjoy our shared space but ammonia produced by pet urine can cause your synthetic turf to smell. This has put some people off from installing artificial grass.

TITAN TURF P-OFF Infill For Pets, when installed on top of your new lawn as an infill, will reduce ammonia turning into gas which can produce a nasty odour.

Pet urine can build up in the sand infill and underneath in the base causing the gas from the ammonia to release into the air over time and produce the strong smell of urine if remaining untreated.

**P-OFF Cool & Fresh** absorbs urine on contact, substantially neutralising odours & significantly reducing build up in the turf backing, sand infill or base material.

## HOW DOES IT COOL?

The reason a lush green natural lawn is cool is moisture. In fact a poorly kept dry natural lawn can actually be hotter than concrete. A standard artificial lawn with a wet down surface will provide some cooling, but temps quickly rise once dried out.

Cool & Fresh naturally holds moisture so when hydrated by rain or watering it will absorb, store, then slowly release moisture over an extended time providing an evaporative cooling effect just like real grass.

Evaporating moisture removes heat leaving a cooler, more comfortable synthetic grass.

## DUAL ACTION

- ✓ Prolongs Evaporative cooling
- ✓ Absorbs Unwanted Odours
- ✓ Anti-Bacterial
- ✓ 100% Safe Natural Minerals
- ✓ Does Not Break Down Over Time

# P-OFF™

## *Bio Enzymatic Urine Eliminator*

Unlike standard cleaners and deodorisers, the active ingredients in **P-OFF** will penetrate the turf surface, travel through the fill material and into the base substrate. The solution will follow the path of the animal urine and other waste matter then degrade uric crystals and other odour causing organic matter until it is **ELIMINATED!**

- 🐾 **Suitable for all types of synthetic turf, outdoor surfaces & drains.**
- 🐾 **Naturally eliminates odour & disease causing bacteria.**
- 🐾 **Simple & easy to use with results in under 5 minutes.**
- 🐾 **Commercial grade concentrated formula.**
- 🐾 **Non-toxic & environmentally friendly.**
- 🐾 **Live enzyme cleaning power.**
- 🐾 **Veterinarian recommended.**
- 🐾 **Controls toxic ammonia.**

### INSTRUCTIONS FOR CLEANING SYNTHETIC TURF:

1. Fill bottle with P-OFF concentrate.
2. Attach hose to foaming applicator.
3. Set applicator. 2-4 for light duty, 5-6 for medium duty or 7-10 for heavy duty cleaning.
4. Starting from the back apply P-OFF in a side-to-side motion & soak the entire area.
5. Apply up to 300mm on vertical surfaces including fences, bricks, furniture etc.
6. Agitate any stains with a foam bristle brush.
7. Allow to penetrate for a **MAXIMUM OF 5 MINUTES.**
8. Thoroughly rinse with fresh water. It is safe to place animals on the damp turf.
9. For real turf, dirt, sand, woodchips etc. apply as directed but do not rinse.

**PLEASE NOTE:** Odour may increase after 1st application & require a 2nd application to remove old embedded organic matter.

### FOR BEST RESULTS:

Use Bio Enzymatic Cleaning Power in conjunction with a Titan Turf Titanium Pet Spec Turf System Including P-OFF Clean & Fresh & Specialised Artificial Grass for dogs.
